FOR IMMEDIATE RELEASE:

JOHNSON SYSTEMS INC. Supplies 20th Century FOX Studios, Los Angeles, CA

CALGARY, Alberta (July, 2015) - JOHNSON SYSTEMS INC. (JSI) is pleased to announce the supply of **fifty-seven (57)** new JSI CD-3000-SV-RR48 Control Systems to 20th Century FOX Studios to replace the failing OEM electronics.

Further to the initial August, 2014 upgrades of ten (10) systems, the remainder all FOX set lighting CD80 Dimmer Racks have now been upgraded with new JSI electronics equipment. This upgrade was performed after almost a full year of flawless operation of the initial ten (10) systems. Selection was based on product performance - no competitive equipment was considered acceptable by FOX Studios management in the long-term interest of the company.

Project installation and integration was professionally handled through area technical dealer Emilight Design. "Studio personnel were very impressed at how fast and clean the equipment installed and they are thrilled about the versatility of the Ethernet input as well as the numerous state-of-the-art 'Green' features available", states Emilight Design's Maurice Garcia.

Details, including product images, are available on JSI's website at www.johnsonsystems.com.
